

OKTARIZA GUNAWAN

Full-Stack Developer | React, Laravel, MySQL, Machine Learning

Email: oktarizagunawan63@gmail.com | GitHub: github.com/oktarizagunawan63 | LinkedIn: linkedin.com/in/oktarizagunawan

PROFILE

Sixth-semester student at Universitas Pamulang with a strong focus on full-stack web development. I build practical web applications with React on the frontend, Laravel or Go on the backend, and MySQL for data storage. My portfolio includes an internal project monitoring dashboard, QR-based restaurant menu system, blood pressure tracker, futsal booking system, and a computer vision prototype for sign language recognition.

EDUCATION

Universitas Pamulang	Sixth-semester student. Current focus: web development, backend APIs, databases, and machine learning.
----------------------	--

TECHNICAL SKILLS

Frontend	React, React Router, Tailwind CSS, JavaScript, HTML5, CSS3
Backend	Laravel, PHP, Go, REST API, MySQL
Machine Learning	Python, TensorFlow, Keras, OpenCV, NumPy, Pandas
Tools	Git, Laragon, Netlify, Jupyter Notebook

SELECTED PROJECTS

PT Amsar Prima Mandiri Project Monitoring Dashboard

React, Laravel, MySQL, REST API, Laragon

- Built an internal dashboard to help the company track project progress, work status, and operational data in one place.
- Connected a responsive React frontend with a Laravel backend and MySQL database through a structured API flow.
- Prepared the application structure for admin features, project reporting, and future monitoring modules.

QR Code Menu Restaurant

React, Laravel, MySQL, REST API

- Created a QR-based digital menu so customers can open restaurant menus directly from their mobile devices.
- Added menu categories, search, dynamic menu updates, and an admin dashboard for easier content management.

Blood Pressure Monitoring System

React, Go, MySQL, Chart.js

- Developed a blood pressure tracker with daily records, history, trend charts, and multi-user support.
- Used Chart.js to make health data easier to read and help users follow changes over time.

OTHER PROJECTS

Futsal Booking System

PHP, MySQL, JavaScript

- Built a futsal court reservation system with slot checking, booking history, and an admin dashboard.
- Designed the booking flow to reduce manual work and make court availability easier to check.

GestureSense - Sign Language Recognition

Python, TensorFlow, OpenCV

- Created a machine learning prototype that recognizes hand sign language gestures in real time using computer vision.
- Worked on image preprocessing, model training, and inference optimization for a more responsive gesture recognition flow.

TARGET ROLES

Full-Stack Developer Intern, Junior Web Developer, Frontend Developer, or Backend/Laravel Developer.
